It's no longer enough to get your computers and telephone back up. You have to know how to keep critical business processes functioning.

Protect your company's revenue stream. Register for DRI International training programs and certification today.

Pre-Conference Courses March 3-5

BCLE-100: Project Management Principles in BCP (March 3)

This introductory-level course is a must for all persons with less than two years experience in DR/BC. The course identifies the requirements and imperatives of business continuity (BC) project management methodologies required to develop a succinct and workable BC plan whether for the enterprise, the facility, or even the department, in private and public organizations.

BCLE 200: Introduction to the Principles of Risk Management (March 4)

This course introduces the basic concepts of Risk Management and develops familiarity with the methodologies and models used in the Business Continuity Planning profession.

BCLE 300: Introduction to Business Impact Analysis (March 5)

This course introduces the reasons for and value of conducting a Business Impact Analysis. The student will understand methodologies, terms and definitions such as Mission Critical business processes, Recovery Time Objectives (RTO), Acceptable Exposure to Loss, etc.

BCLE-5000: Business Continuity Management, Preparatory Course* (March 3-5)

EXPERIENCED This is the up-dated and improved replacement to DRII's most popular course over the past decade (BCP 501). The two-day course leads you through a review of the Professional Practices and their application, drawing on your experience and knowledge, and preparing you for the CBCP exam. The course covers all 10 PP subject areas, and most elements of the contingency and recovery plan. This course is highly recommended for persons with five years or more experience in BCM.

Post-Conference Courses March 9-13

BCLE-212: Risk Mitigation in Business Continuity Planning (March 9-II)

One of DRII's most long lived and most requested courses. Insurance industry experts will take you through this course on risk identification, evaluation, and control, as well as emergency response. Participants are introduced to prevention programs and control measures that reduce the probability of the more frequent types of incidents that will impact any business.

BCLE-350: Business Impact Analysis (March 9-II)

This course builds upon the previous Business Impact Analysis methodologies offering a higher level of expertise in processes and the importance of this the BIA in the functional requirements phase of corporate contingency planning. Participants learn how to develop and successfully conduct a BIA project.

(NEW) BCLE-930: Reputation Recovery Workshop (March 9-II)

This course is designed for BCM professionals who have to develop, manage, or execute crisis communication activities within their business continuity program. This workshop will look specifically at the concept of reputation—its evolution and risk factors. It teaches how to plan to preserve the organization's reputation before a disaster strikes and also how to rebuild it after a disaster strikes. Key messages are developed, crisis plans are evaluated, and participants investigate the basics of public relations as well as dealing with the news media in good times and bad.

BCLE-5000: Business Continuity Management, Preparatory Course*(March 9-II)

EXPERIENCED See description under pre-conference workshops.

BCLE-6000: Master-Level Case Study Preparatory Course**(March 9-II)

EXPERIENCED PROFESSIONALS This course addresses all 10 areas of professional practice for business continuity planners and prepares the candidate for the most coveted of certifications, the Master Business Continuity Professional (MBCP) certification. See DRII web site for registration prerequisites.

BCLE 2000: Business Continuity Course for Advanced Professionals* (March 9-13)

Participants review the Professional Practices and all aspects of initiating, creating, developing, and testing the business continuity plan and managing the BCM process. Designed especially for persons newer to BCM, this course will educate in all 10 subject areas, as well as preparing students for the CBCP level exam.

*includes CBCP Exam ** includes MBCP Exam

Examinations

Don't limit your career. Get your CBCP certification — the critical credential the best employers are requiring.

Both the CBCP and the MBCP exams will be offered at DRJ Spring World 2005. There is no additional exam fee for attendees taking the BCLE 2000, BCLE 5000, or the BCLE 6000 courses at the conference. For attendees taking the examination only, there is a \$250 registration fee, payable directly to DRI International.

*Visit the DRII Web site to review experience requirements for CBCP or MBCP Certification
